Condensed interim consolidated financial statements - 3rd quarter

September 30, 2017 and 2016

The condensed interim consolidated financial statements of Robex Resources Inc. for the third quarter ended September 30, 2017 as well as the corresponding comparative data were not subject to a review by the Company's auditor.

Table of contents

CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS – 3rd quarter

Notes to condensed interim consolidated financial statements:

INTERIM CONSOLIDATED STATEMENTS OF INCOME (LOSS)
(unaudited)

(all amounts are in Canadian dollars unless otherwise indicated)

	Third quarters ended September 30,		Nine-month periods ended September 30,	
	2017	2016	**2017**	2016
	$	$	**$**	$
REVENUE - GOLD SALES	**14,786,230**	---	**42,398,793**	---
COSTS OF OPERATIONS				
Mining operation expenses - note 5	**5,383,632**	45,613	**15,712,048**	60,695

Additional information (note 17)

The accompanying notes are an integral part of these condensed interim consolidated financial statements.

1 - NATURE OF OPERATIONS AND GOING CONCERN

Nature of activities

Robex Resources Inc. (the "Company") is a junior Canadian operation and exploration mining company. The Company has entered into commercial operation on it's Nampala deposit, on January 1, 2017. In addition to its operation mining activities, the Company currently holds four exploration licenses, all located in Mali, in West Africa. These permits all demonstrate a favourable geology with a potential for the discovery of gold deposits. The head office address is 437, Grande-Allée Est, Québec (Québec) G1R 2J5, Canada.

Going concern

These condensed interim consolidated financial statements have been prepared using International Financial Reporting Standards (IFRS) applicable to a going concern, which contemplates the realization of assets and settlement of liabilities in the normal course of business as they come due. In assessing whether the going concern assumption is appropriate, management takes into account all available information about the future, which is at least, but not limited to, twelve months from the end of the reporting period. Management is aware in making its assessment of material uncertainties related to events and conditions that lend a significant doubt upon the Company's ability to continue as a going concern and accordingly, the appropriateness of the use of IFRS applicable to a going concern, as described in the following paragraph. These condensed interim consolidated financial statements do not reflect the adjustment to the carrying values of assets and liabilities, expenses and consolidated balance sheet classifications that would be necessary were the going concern assumption inappropriate. These adjustments could be material.

As at September 30, 2017, the Company has an accumulated deficit of $34,123,180 ($41,155,836 as at December 31, 2016). In addition to ongoing working capital requirements, the Company must secure sufficient funding to meet its obligations and existing commitments for exploration and evaluation programs, for mining operation and for pay general and administration costs. As at September 30, 2017, the Company had a working capital deficiency of $14,889,477 ($24,188,098 as at December 31, 2016), including cash and cash equivalents of $878,686 ($2,347,224 as at December 31, 2016).

Until the Company's mining operations have confirmed an adequate improvement in financial condition, the continuation of its activities will depend on its ability to continue to have necessary financing by way of borrowing. While management has been successful in securing financing in the past, there can be no assurance it will be able to do so in the future, that such sources of funding or initiatives will be available to the Company or that they will be available on terms acceptable to the Company. If management is unable to renew necessary funding, the Company may be unable to continue its operations, and amounts realized for assets might be less than amounts reflected in these condensed interim consolidated financial statements.

Although the Company has taken steps to verify the title to mining properties in which it has an interest in accordance with industry standards for the current stage of exploration of such properties, these procedures do not guarantee the Company's title. Property title may be subject to unregistered prior agreements and may not be in compliance with regulatory requirements.

2 - BASIS OF PRESENTATION

These condensed interim consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS), as issued by the International Accounting Standards Board (IASB), applicable to the preparation of interim consolidated financial statements, including IAS 34, «Interim Financial Reporting». The condensed interim consolidated financial statements should be read in conjunction with the annual consolidated financial statements for the year ended December 31, 2016, which have been prepared in accordance with IFRS as issued by the IASB. These condensed interim consolidated financial statements were approved by the Board of Directors for issue on November 21, 2017.

3 - SIGNIFICANT ACCOUNTING POLICIES

Functional and presentation currency

The Canadian dollar is the presentation currency. The euro is the functional currency of the company. It was amended on January 1, 2017. Before January 1, 2017, the CFA franc was the functional currency of the company. This change had no impact on these condensed interim consolidated financial statements as the exchange rate between the euro and the CFA franc was set by the European Union and West Africa at a fixed rate of 655.957 CFA francs for one euro.

Inventories

Inventories of silver (metals) are marketable inventories and are measured at net realizable value, which is the estimated selling price in the ordinary course of business less estimated costs to realize the sale.

The material extracted from the mining pits is classified as a sterile material corresponding to stripping costs and capitalized to property, plant and equipment, or as ore stocks. Ore represents material that, at the time of extraction, is expected to be processed into a saleable form and sold at a profit. Raw materials are comprised of ore in stockpiles. Ore is accumulated in stockpiles that are subsequently processed into gold in a saleable form. Work in process represents dorés in the processing circuit that has not completed the production process, and is not yet in a saleable form. Mine operating supplies represent commodity consumables and other raw materials used in the production process, as well as spare parts and other maintenance supplies that are not classified as property, plant and equipment.

Inventories are valued at the lower of cost and net realizable value. Cost is determined on a weighted average basis and includes all costs incurred, based on a normal production capacity, in bringing each product to its present location and condition. Cost of inventories includes direct labour, materials and contractor expenses and an allocation of mine site overhead costs. As ore is sent to the mill for processing, costs are reclassified out of inventory based on the average cost per tonne of the stockpile.

The Company records provisions to reduce inventory to net realizable value to reflect changes in economic factors that impact inventory value and to reflect present intentions for the use of slow moving and obsolete supplies inventory. Net realizable value is determined with reference to relevant market prices less applicable variable selling expenses. Provisions recorded also reflect an estimate of the remaining costs of completion to bring the inventory into its saleable form. Provisions are also recorded to reduce mine operating supplies to net realizable value, which is generally calculated by reference to its salvage or scrap value, when it is determined that the supplies are obsolete. Provisions are reversed to reflect subsequent recoveries in net realizable value where the inventory is still on hand.

3 - SIGNIFICANT ACCOUNTING POLICIES - (continued)

Property, plant and equipment

Property, plant and equipment are initially and subsequently recorded at cost less accumulated depreciation and impairment. Cost includes expenditures that are directly attributable to the acquisition of an asset. Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company and the cost can be measured reliably. The carrying amount of a replaced asset is derecognized when replaced.

Repairs and maintenance costs are charged to the consolidated statement of income (loss) during the period in which they are incurred.

The Company allocates the amount initially recognized in respect of an item of property, plant and equipment to its significant parts and depreciates separately each such part. Residual values, method of depreciation and useful lives of the assets are reviewed annually and adjusted if appropriate. In case of change in these estimates, they are accounted for prospectively.

Expenditures on major maintenance rebuilds or overhauls are capitalized when it is probable that the expenditure will extend the productive capacity or useful life of an asset.

Gains and losses on disposals of property, plant and equipment are determined by comparing the proceeds with the carrying amount of the asset and are included in the consolidated statement of income (loss).

Property acquisition costs, exploration costs and mining development costs

Costs incurred relative to proven and probable developed and undeveloped reserves, and probable non-reserve resources, if there is sufficient objective evidence to support a conclusion that it is probable that the non-reserve resources will be produced (the "probable non-reserve resources"), are included in the depreciable amount. Depreciation is the systematic allocation of the depreciable amount of an asset over its useful life. The depreciable amount of the asset is its cost, or any other amount substituted for cost, less its residual value.

Depreciation begins when a property is put into commercial operation and is calculated using the units of production method over the expected operating life of the mine based on estimated recoverable ounces of gold. Estimated recoverable ounces of gold include proved and probable reserves.

Exploration costs incurred on a property in production are capitalized to property, plant and equipment and amortized based on estimated recoverable ounces of gold in the resource area concerned.

Equipment related to mining operations

Equipment related to mining operations is recorded at cost and depreciated, less residual value, using the units of production method over the expected operating life of the mine based on estimated recoverable ounces of gold. However, if the estimated useful life of the assets is less than that of the mine, depreciation is based on their estimated useful life.

Buildings and office development

Buildings and office development are recorded at cost and depreciated, less residual value, using the straight-line method over the expected operating life of the mine. However, if the expected useful life of the assets is less than that of the mine, depreciation is based on their expected useful life.

3 - SIGNIFICANT ACCOUNTING POLICIES - (continued)

Property, plant and equipment - (continued)

Assets under construction

Assets under construction include property, plant and equipment under construction, including those intended for their own use. The cost includes the purchase price, as well as any cost directly attributable to bringing the asset into working condition for its intended use. Assets under construction are classified in the appropriate tangible asset category when the costs are incurred. Assets under construction are recognized at cost, less any recognized impairment loss, and are not depreciated. Their depreciation commences only when they are ready for their intended use.

Tools, equipment and vehicles

Tools, equipment and vehicles include communications equipment and computer equipment and are recorded at cost. Depreciation is calculated using the declining balance method at rates of 20% or 30%, and is recognized in the consolidated statement of income (loss).

Exploration equipment

Depreciation of exploration equipment is expensed or capitalized to mining properties according to the capitalization policy of mining properties. Depreciation of property, plant and equipment, if related to mine development expenditures, is capitalized in mine development costs. These amounts will be recognized in the consolidated statement of income (loss) through depreciation of property, plant and equipment when they are put into production (or when mining properties are put into production). For those which are not related to exploration and development activities, depreciation expense is recognized directly in the consolidated statement of income (loss).

Stripping costs

In open pit mining operations, it is necessary to remove overburden and other waste materials to access ore from which minerals can be extracted economically. The process of mining overburden and waste materials is referred to as stripping. Stripping costs incurred in order to provide initial access to the ore body (referred to as pre-production stripping) are capitalized and amortized when the ore to which the costs are attached is extracted from the pit and the mine is considered operational. When these costs are directly attributable to the development of a tangible asset category, they are recorded into it.

It may be also required to remove waste materials and to incur stripping costs during the production phase of the mine. The Company recognizes a stripping activity asset if all of the below conditions are met:

(i) It is probable that the future economic benefit (improved access to the component of the ore body) associated with the stripping activity will flow to the Company.

(ii) The Company can identify the component of the ore body for which access has been improved.

(iii) The costs relating to the stripping activity associated with that component can be measured reliably.

The Company measures the stripping activity at cost based on an accumulation of costs incurred to perform the stripping activity that improves access to the identified component of ore, plus an allocation of directly attributable mine site overhead costs.

After initial recognition, the stripping activity asset is carried at cost less depreciation and impairment losses in the same way as the existing asset of which it is a part.

The stripping activity asset is depreciated using the units of production method over the expected operating life of the mine, based on the estimated recoverable ounces of gold.

3 - SIGNIFICANT ACCOUNTING POLICIES - (continued)

Property, plant and equipment - (continued)

Borrowing costs

Borrowing costs attributable to the acquisition, construction or production of qualifying assets are added to the cost of those assets, until such time as the assets are substantially ready for their intended use. All other borrowing costs are recognized as financial expenses in the consolidated statement of income (loss) in the period in which they are incurred.

Non-controlling interests

Non-controlling interests consist of the interests in the equity of subsidiaries held by outside parties. The share of the net assets attributable to the non-controlling interests is presented within equity. Their share of profit or loss and other comprehensive income (loss) is recognized directly in equity even if the non-controlling interests have a deficit balance.

Income recognition

Income includes the sale of gold and by-products (silver). Income from the sale of gold and silver is recognized when legal titles (rights and obligations) on metals are transferred to the buyer, it is probable that economic benefits associated with the transaction will flow to the Company and it can be measured reliably. Gold and silver sales are recorded in net income.

Earnings (loss) per share

Basic earnings per share for the period are calculated based on the weighted average number of common shares outstanding during the period.

Diluted earnings (loss) per share for the period are calculated using the weighted average number of common shares outstanding during the period, plus the effects of dilutive potential common shares outstanding during the period. The treasury stock method is used to determine the dilutive effect of the warrants, stock options and the if-converted method is used for convertible debentures. Under these methods, the calculation of diluted earnings (loss) per share is made, as if all dilutive potential shares had been issued at the later of the beginning of the year or the date of issuance, as the case may be, and as if the funds obtained thereby had been used to purchase common shares of the Company at the average quoted market value of the common shares during the period.

(all amounts are in Canadian dollars unless otherwise indicated)

4 - SEGMENTED INFORMATION

The company operates in Mali. The operating segments presented reflect the Company's management structure and how the Company's principal operational decision-maker assesses business performance. The composition of the reporting segments was changed on January 1, 2017 to represent operating, exploration and corporate management activities separately. The Company evaluates the performance of its operating segments primarily based on operating income, as shown in the following tables.

				Quarter ended September 30, 2017

13 - WARRANTS

The warrants that were granted varied as follows :

	Nine-month period ended September 30, 2017 (9 months)		Year ended December 31, 2016 (12 months)	
	Number	**Weighted average exercise price**	Number	Weighted average exercise price
Outstanding at the beginning	**80,000,000**	**$0.25**	80,000,000	$0.25
Outstanding at the end	**80,000,000**	**$0.25**	80,000,000	$0.25
Exercisable	**80,000,000**	**$0.25**	80,000,000	$0.25

The following table summarizes information about the Company's warrants as at September 30, 2017.

Number	**Exercise price**	**Remaining Life (years)**
80,000,000	$0.25	0.08

Since these instruments are payable in Canadian dollars, which is not the functional currency of the Company, stock purchase warrants do not respect the criteria defined by the IFRS for classification as equity instruments. They are thus considered as derivative instruments initially and subsequently valued at fair value and presented as financial liability. Any subsequent change in the fair value is recognized in profit or loss.

(all amounts are in Canadian dollars unless otherwise indicated)

13 - WARRANTS - (continued)

Fair values as at September 30, 2017 and December 31, 2016 have been estimated using the Black-Scholes option-pricing model with the following assumptions:

	September 30, 2017 (unaudited)	December 31, 2016
Risk-free interest rate	**1.51 %**	0.73 %
Expected volatility	**85.18%**	56.97 %
Dividend yield	**0 %**	0 %
Expected life	**0.08 year**	0.83 year

The fair value of warrants is presented in note 20 hereinafter.

14 - ENVIRONMENTAL LIABILITIES

	September 30, 2017 $ (unaudited)	December 31, 2016 $
Provision related to the subsequent dismantling of the facilities being built on the Nampala site	**363,503**	332,569

The Company’s activities are subject to various laws and regulations regarding environmental restoration and closure provisions for which the Company estimates future costs. These provisions may be revised on the basis of amendments to such laws and regulations and the availability of new information, such as changes in reserves corresponding to a change in the mine life and discount rates, changes in estimated costs of reclamation activities and acquisition or construction of a new mine. The Company makes a provision based on a best estimate of the future cost of rehabilitating mine sites and related production facilities on a discounted basis.

(all amounts are in Canadian dollars unless otherwise indicated)

15 - SHARE CAPITAL

Stock option plan

The stock options varied as follows:

	September 30, 2017 (9 months)		December 31, 2016 (12 months)	
	Number	**Weighted average exercise price**	Number	Weighted average exercise price
Oustanding at the beginning	**1,650,000**	**$0.15**	2,058,334	$0.20
Granted	**12,350,000**	**$0.09**	1,000,000	$0.16
Cancelled or expired	**---**	**---**	(1,408,334)	$0.22

(all amounts are in Canadian dollars unless otherwise indicated)

18 - EARNINGS (LOSS) PER SHARE

	Third quarters ended September 30,		Nine-month periods ended September 30,	
	2017	2016	**2017**	2016
	$	$	**$**	$
Net earnings (loss) attribuable to common shareholders	**380,894**	2,104,208	**7,032,656**	(11,602,017)
Adjustement related to convertible debentures (1)	**---**	(1,532,931)	**---**	---
Diluted net earnings (loss)	**380,894**	571,277	**7,032,656**	(11,602,017)
Basic weighted average number of shares outstanding	**579,509,566**	579,509,566	**579,509,566**	579,509,566
Conversion rights related to convertible debentures (1)	**---**	71,050,000	**---**	---
Stock options (1)	**1,820,985**	---	**---**	---
Warrants (1)	**---**	---	**---**	---
Diluted weighted average number of shares outstanding	**581,330,551**	650,559,566	**579,509,566**	579,509,566
Basic net earnings (loss) per share	**0.001**	0.004	**0.012**	(0.020)
Diluted net earnings (loss) per share	**0.001**	0.001	**0.012**	(0.020)

(1) The calculation of the hypothetical conversions excludes all anti-dilutive conversion rights, options and warrants. Some options, warrants and conversion rights are anti-dilutive either because their price is higher than the average price of the Company's common shares for each of the periods shown or because the impact of the conversion of these elements on the net income would result in diluted earnings per share being greater than the basic earnings per share for each of these periods. For the quarter ended September 30, 2017, 149,650,000 conversion rights, 1,650,000 options and 80,000,000 warrants are not included in the diluted net earning (loss) per share calculation (79,600,000 conversion rights, 1,900,000 options and 80,000,000 warrants for the quarter ended September 30, 2016). For the nine-month period ended September 30, 2017, 149,650,000 conversion rights, 14,000,000 options and 80,000,000 warrants are not included in the diluted net earning (loss) per share calculation (150,650,000 conversion rights, 1,900,000 options and 80,000,000 warrants for the nine-month period ended September 30, 2016).

(all amounts are in Canadian dollars unless otherwise indicated)

19 - CONTINGENCY

Environmental Protection

The Company's activities are subject to governmental laws concerning the protection of the environment. The environmental consequences are difficult to identify, whether it is at the level of the results, of the term or its impact. To the best knowledge of management, the Company is operating in compliance with the laws and regulations currently in effect. Costs resulting from the restructuring of sites are recorded in the results for the year or included in the cost of the fixed assets concerned in the period in which it will be possible to make a reasonable estimate.

20 - FINANCIAL INSTRUMENTS

a) Market risk

i) Fair value

The table below provides an analysis of the financial instruments which are measured at fair value following the initial measurement.

	Level 1	Level 2	Level 3	September 30, 2017 (unaudited) Total fair value financial liabilities
Financial liabilites				
Convertible debentures - Debt at amortized cost	---	---	**16,526,366**	**16,526,366**
Convertible debentures - Conversion rights	---	---	**3,735,153**	**3,735,153**
Warrants	---	---	**259**	**259**
	---	**---**	**20,261,778**	**20,261,778**

	Level 1	Level 2	Level 3	December 31, 2016 Total fair value financial liabilities
Financial liabilites				
Convertible debentures - Debt at amortized cost	---	---	14,847,392	14,847,392
Convertible debentures - Conversion rights	---	---	2,791,669	2,791,669
Warrants	---	---	28,847	28,847
	---	---	17,667,908	17,667,908

During these exercises, there were no transfers of financial instruments between levels 1 and 2 or levels 2 and 3.

(all amounts are in Canadian dollars unless otherwise indicated)

20 - FINANCIAL INSTRUMENTS - (continued)

a) Market risk - (continued)

i) Fair value - (continued)

The table below presents changes in financial instruments recognized at fair value and measured according to Level 3 parameters:

Conversion rights	September 30, 2017 $ (9 months)	December 31, 2016 $ (12 months)
Balance at the beginning	**2,791,669**	4,233,809
Changes in fair value recorded in profit or loss	**818,839**	(1,240,838)
Impact of exchange rate changes presented in profit or loss	**111,374**	(250,315)
Impact of exchange rate changes presented in other comprehensive income (loss)	**13,271**	49,013
Balance at the end	**3,735,153**	2,791,669

Warrants	September 30, 2017 $ (9 months)	December 31, 2016 $ (12 months)
Balance at the beginning	**28,847**	1,318,215
Changes in fair value recorded in profit or loss	**(29,337)**	(1,255,251)
Impact of exchange rate changes presented in profit or loss	**1,151**	(77,937)
Impact of exchange rate changes presented in other comprehensive income (loss)	**(402)**	43,820
Balance at the end	**259**	28,847

(all amounts are in Canadian dollars unless otherwise indicated)

20 - FINANCIAL INSTRUMENTS - (continued)

b) Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its obligations as they fall due.

The following table shows the contractual maturities of financial liabilities as at September 30, 2017 :

	Carrying amount	Less than a year	From 1 to 3 years	More than 3 years
Accounts payable	**14,343,112**	**14,343,112**	**---**	**---**
Convertible debentures - Conversion rights (1)	**3,735,153**	**---**	**---**	**---**
Convertible debentures - Debt components (1-3)	**16,526,366**	**---**	**18,895,000**	**---**
Warrants (2)	**259**	**---**	**---**	**---**
Long-term debt (3)	**18,815,011**	**9,261,504**	**11,838,969**	**111,998**
Lines of credit	**699,132**	**699,132**	**---**	**---**
	54,119,033	**24,303,748**	**30,733,969**	**111,998**

The following table shows the contractual maturities of financial liabilities as at December 31, 2016:

	Carrying amount	Less than a year	From 1 to 3 years	More than 3 years
Accounts payable	17,048,668	17,048,668	---	---
Convertible debentures - Conversion rights (1))	2,791,669	---	---	---
Convertible debentures - Debt components (1-3)	14,847,392	---	18,895,000	---
Warrants (2)	28,847	---	---	---
Long-term debt (3)	19,468,136	10,636,152	9,383,490	1,946,127
Lines of credit	5,380,183	5,380,183	---	---
	59,564,895	33,065,003	28,278,490	1,946,127

(1) Convertible into 78,600,000 common shares of the Company in November 2018, and into 71,050,000 common shares of the Company in July 2018.

(2) All 80,000,000 warrants expired in October 2017.

(3) Future maturities relating to these liabilities exceed their carrying amount because they include both capital and interest payments.

21 - RELATED PARTY TRANSACTIONS

Results for the nine-month period ended September 30, 2017 include expenses of $3,258,059 that was incurred with the directors and officers of companies controlled by them ($2,345,338 for the nine-month period ended September 30, 2016), including a total interest amount of $1,415,526 on the convertible debentures ($1,330,518 for the nine-month period ended September 30, 2016). These transactions occurred in the normal course of operations and are measured at the exchange amount which is the amount of consideration established by the related parties.

22 - SUBSEQUENT EVENTS

On October 29, 2017, 80,000,000 warrants with an exercise price of $0.25 reached maturity. There are therefore no longer any warrants in effect.
